CAMPBELL, THE ORCHARD CITY OF THE FAMOUS SANTA CLARA VALLEY

Campbell INTER-URBAN Press

FOR THE BEST INTERESTS OF CAMPBELL AND COMMUNITY

Vol. 34, No. 2 — CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA. — FRIDAY, DECEMBER 2, 1927

California Ranch News

California apples will be more plentiful this year than in 1925, but markedly more scare than last year. The estimated yield of 4,413,000 boxes is almost 2,000,000 boxes under last year's production, but over a million boxes in excess of the 1925 yield.

There is not going to be any frost on the pumpkins of the San Joaquin Valley this year if the weather prevalent so far for November continues. There has been no frost and tender vegetables such as tomotoes and potatoes are still growing vigorously, with roses and lilies blooming along with such late flowers as chrysanthemums.

Canning peach growers of California lost approximately $1.170,275 by not restricting their deliveries to canneries and allowing an additional 50,-000 tons of fruit to rot on the ground, the division of markets of the State Department of Agriculture announced last week after a study of the 1927 pack and prices.

The board of directors of the California Fruit Growers' Exchange announced last week that it had adopted to amend the national immigration laws to bring Mexican immigration under the quota provision. The resolution is being sent to California senators and congressmen urging them to oppose the legislation, and pointing out that 11,000 citrus growers represented by the organization are almost entirely dependent upon Mexican labor for picking their crops.

Plans for the second annual Christmas Fat Stock Week, to be held at the Los Angeles Union Stock Yards on December 5 to 10, are well under way, under the direction of an executive committee composed of D. H. Lillywhite, R. A. Condee, J. A. McNaughton, C. B. Swift and Julian McPhee. The premium list, carrying more than $2000 in prize money in open classes for individuals and carlots of sheep, cattle and swine, has already been mailed to prospective exhibitors.

The 1927-28 orange season of the Redlands district is nearly here and the packing-houses are ready for another season. The checkup of the last season shows that so far about 6009 cars have been shipped, and it is probable that the total will reach 6020 cars, as some Valencia oranges recently remained in the packing-house to be shipped. The new crop will not be so large, conservative estimates being that it will be 1000 cars short of that of 1926-27 crop. Early rains have been of the greatest benefit, however, and the crop may be larger than was first estimated.

Preliminary estimates of California's rice production, announced last week by the Federal-State Co-operative Crop Reporting Service, places the crop at 8,905,000 bushels, equivalent to 3,987,000 bags. Compared with the production in 1926, this is an increase of 910,000 bushels. As a result of this gain in yield, California will rank second among the state in the output of rice, being exceeded only by Louisiana, which will produce in excess of 16,000,000 bushels.

Importance of irrigation in California is reflected in a report just completed for the Orange County Investment Corporation which discloses that approximately $100,000,000 in irrigation bonds are outstanding in the State; the present value of land securing the bonds is about $800,000,000, and before irrigation facilities were provided those same lands did not produce crops to justify a total land value in excess of $25,000,000. Irrigation in California has, therefore, been responsible for a net increase in land values of $775,000,000, the report points out, and the annual average return for the past five years on gross production on the lands of irrigation districts will average more than $200,-000,000 a year.

The total walnut production of the State is set at 42,000 tons—a figure nearly three times as great as the production in 1926. Almonds will total 11,600 tons, a decrease of 4,000 tons.

Southern Pacific company has applied to the Railroad Commission for permission to cancel a rate of $75.00 per double-deck car on feeder sheep from Red Bluff to Mott, and return. Upon cancellation of the 73.00 rate the charge for such shipment will be $100.00 per car for the round-trip movement.

Golden State
News of Interest to All

Students in the animal science department of the University of California will be ensconsed in their new building at Davis by August, 1928, according to plans announced. Bids on the building, which is to cost approximately $300,000, were called for, to be opened November 25. Funds for the building were appropriated last winter by the legislature.

Motorists of California will pay a larger total gas tax than those of any State in the Union, according to government reports of the consumption for the first six months of 1927. These show that a total of $101,250,841 was collected for the first half year the country over. Of this total California stood first with $9,055,934, or approximately 9 per cent of the total.

New building operations at the University of California at Berkeley, involving an expenditure of about $1,-850,000, will begin as soon as plans just ordered by the University regents can be drawn by the architects, it was announced last week from the office of President W. W. Campbell. The proposed construction will be the first step in providing the new buildings made possible by last year's $6,-000,000 State bond issue.

A marked reduction in California fire losses this year, and especially in damage to timberlands, was reported by Fred G. Stevenot, State Director of natural resources. Total losses during the recent season of fire hazard, Stevenot declared, were $801,892.30 as compared with $978,424,462 last year. The damage to timberlands, he showed, amounted to only $19,275 against timber losses of $146,453 during the 1926 season.

Seventeen California counties fail to enforce the red-light abatement law, according to a year's survey completed by Edward E. Grant, an attorney retained by the State Law Enforcement League, and communicated last week to James A. Johnston, chairman of the State Crime Commission. Sacramento leads the cities in volume of vice, Grant says, and Vallejo leads in "brazenness." The counties marked in red in an accompanying chart are: San Francisco, Siskiyou, Humboldt, Shasta, Lassen, Plumas, Nevada, Colusa, Sonoma, Solano, Sacramento, Amador, Tuolumne, Fresno, Monterey, San Luis Obispo and Kern.

"Send us California flowers please. And, we shall send you Turki flowers —." This unusual request has come to this State from a University in Tashkent, which is in Turkestan, an out-lying province of Soviet Russia on the border of the Himalayas. The message has been received here at the botanical division of the California Academy of Science, in charge of Miss Alice Eastwood. Already the exchange of flowers has taken place between California and Turkestan, at the opposite ends of the earth.

Faced with reports that child labor is on the increase in California, the State Department of Education last week launched an investigation of the situation to determine whether provisions of the compulsory school attendance law are being violated. William John Cooper, State Superintendent of Public Instruction, ordered all city, country and district school superintendents to take up the problem immediately with attendance supervisors.

California holders of Irish bond certificates, for which $450,000 was subscribed in 1920 and which are expected to have a redemption value of more than $100,000, are in danger of forfeiting their claims unless they take prompt steps to seek redemption, according to a statement made last week by Daniel E. Doran, who acted as secretary of the San Francisco district of the Irish bond campaign. "Holders of bond certificates must file their claims with the receivers appointed by the New York courts prior to January 15, 1928, in order that they may receive their share of the $2,800,000 which is available for the payment of bond certificate subscribers," said Doran.

Thirty miles of trees will be planted during the next few months to grow to grace the highways of Los Angeles county, if the plans of the forestry department of the county do not miscarry. Snuggled up against the hills in Altadena are about 300,000 trees that gradually will be transplanted in various parts of the county. An ambitious program of reforestation is to be carried out by Chief Forester Turner and Chief Assistant Forester Stanford. Their plan covers, in addition to wayside planting, a better watershed cover. Besides the Altadena nursery, which has a capacity of 500,000 trees, there are other fields which are running to their capacity of about 80,000 this year.

CONSOLIDATED TUES. AT LOS GATOS

Santa Clara County Consolidated Chambers of Commerce will hold its next regular monthly meeting at the Hotel Lyndon, Los Gatos, Tuesday, December 6.

Reports on the Prune Week activities will be made by W. P. Powers, chairman of the Prune Week committee. Numerous other reports are expected to be made, including that by W. K. Roberts of Sunnyvale on the water conservation program.

Those interested in the welfare of the county are invited to attend.

Rucker's Radio Store Is Closed by Sheriff

Sheriff George W. Lyle placed an attachment on Rucker's Radio Studio, 34 North Santa Cruz avenue, on Thursday of last week, and closed the store on complaint of creditors. It is stated that the store owed some $522.50 back rent.

Allen A. Hunt, radiotrician, and Wm. W. Wessenburg, electrician, who were employed at Ruckers, will open on December 1, a radio service and repair shop at 28½ West Main street. They will handle exclusive radio and electrical service. The new firm will be known as Hunt and Wessenburg.

Hunt is well known in Los Gatos, being a member of Hunt and Chase's orchestra for several years, and Wessenburg's home was in San Francisco before he moved here a few weeks ago.

The State commission to study feasibility of establishing a pension system for State employes held its first meeting at Sacramento last week. W. A. Johnstone, president of the State civil service commission, was elected chairman; J. C. Whitman, secretary of the San Francisco Stock Bond Exchange, vice chairman and Miss Lodmea Shurtleff, secretary.

Carrying the State's building program along another step toward completion, announcement has just been made by George B. McDougall, State architect, that bids will be invited shortly for attendants' buildings at the Mendocino State Hospital and the Pacific Colony. The new units about to be advertised are budget projects of concrete and frame construction. That at the Mendocino hospital is made possible under a $90,000 budget appropriation and that at the southern institution by a $50,000 allotment.

The California Labor Market Bulletin, for October, 1927, issued by Walter G. Mathewson, chief of the division of labor statistics and law enforcement, shows a decrease in factory employment in October, 1927, compared with October, 1926. The bulletin shows that the same 793 industrial establishments in California, which employed 151,649 workers in October, 1926, employed only 144,936 workers in October, 1927, a decrease of 6,713 employes or 4.4 per cent. The total weekly payroll for the same industrial plants was $4,371,345 in October, 1926, and was $4,127,293 in October, 1927, a decrease of $244,052, or 5.6 per cent.

The conflict between automobile advertisements promising a sustained speed of sixty miles an hour and state vehicle laws limiting cars to thirty or thirty-five miles an hour, will be wiped out by super-highways if plans now in the formative stage in this state are carried out. Two such highways are under contemplation in California at present—one from San Francisco to Los Angeles and the other from San Francisco to the state capital, Sacramento.

Help for the blind of the State is forecast in the conference of several department heads announced last week by Earl E. Jensen, director of institutions. As a result of the request of Governor C. C. Young for a State policy of vocational training and education for the blind to be worked out before the next cabinet meeting An effort will be made to furnish the blind training in a variety of occupations suited to their individual needs.

Planting of spinach in the Porterville district, in preparation for the spring canning season, has recently been under way. About 250 acres will be devoted to cultivation of this vegetable, according to L. W. Walters, manager of the Porterville plant of the Fred B. Neuhoff company, first cutting of the spinach will be about March 1st. The local plant is being remodeled in preparation for the coming campaign. Last season the Porterville plant put out 40,000 cases of spinach, and this year about 75,000 cases are anticipated.

NEW HELP AT OUR POST OFFICE

The local postoffice has installed an automatic cancelling machine, transferred by department order from Santa Clara. This will greatly facilitate the handling of the heavy Christmas mails, and do away with the noisy tat-too of the hammer device.

Do your Christmas mailing early. Parcels must start East soon to avoid the jam that will soon be on in the large cities and terminals. To insure delivery of your gifts by city or rural carriers they should arrive at their destinations at least two or three days before Sunday, the 25th. Be sure to pack in strong boxes and wrap securely. A score of parcels in the past two weeks have arrived at the local office broken and the contents loose in the mail sack.

In a week or two there will be tons more piled around and on top of yours.

No stickers or seals on the face of parcels or other mail.

Send Auto License Applications Now

SACRAMENTO, Nov.—30. (Special)—Applications for 1928 automobile license plates may be forwarded by mail to the division of motor vehicles at Sacramento any time after tomorrow.

This announcement was made today by Lon W. Butler, chief clerk of the division, who will be in charge of the work of renewing more than 1,800,000 license plates during the approaching renewal period.

The fee for regular passenger cars will be $3—the same as last year.

The white certificate of registration should accompany the fee.

More than seven carloads of plates will be handled by the Sacramento office alone. A force of 500 persons will be used during the rush season.

Rates for trucks and other commercial vehicles are the same.

Rains in all vegetable section of the State early in November have been of great benefit to all growing crops, according to the November report of conditions just issued by the bureau of crop and livestock estimates of the United States Department of Agriculture, in co-operation with the California Department of Agriculture. No damaging frosts have occurred in any of the main vegetable sections since the second week in October, and all crops have been enjoying favorable conditions. The head lettuce crop has been planted in the Imperial Valley area, and thinning has been done in the Salt River Valley of Arizona.

California growers have maintained their reputation as leaders in co-operative marketing, to judge by the annual report of E. G. Dezell, general manager of the California Fruit Growers' Exchange, just released. Based on returns for the organization, which markets practically three-fourths of the California citrus crop, the industry returned for the year ending October 31, approximately $120,000,000 on 70,-600 carloads of oranges, lemons and grapefruit, the highest figures for both volume of shipment and returns in the history of the industry. Returns f.o.b. California were nearly $22,000,000 ahead of last year, and shipments nearly 7000 cars greater. The estimated retail value of the crop was $225,000,000.

An addition is to be made to California's fig acreage with the opening of a new unit of 1000 acres, to be planted to Clarkadota figs, as part of the Romola project in Riverside county, just announced by Alexander Hursh, president of the Pacific Development Company, sponsoring the enterprise. Plans for the erection of a large cannery at Romoland with modern machinery to process the product of the big orchards are being made, according to President Hursh. The cannery is to be operated on a co-operative basis, three-fourth of the net proceeds to go to the growers. Aside from the fig plantings, more than 2500 acres of the project have been planted to juice grapes.

The potato crop of California estimated at 7,956,000 bushels, an increase of more than a million bushels over last year's yield. Sweet potatoes are estimated at 1,200,000 bushels, which is 36,600 bushels over the crop in 1926.

CAMP FIRE GIRLS DRILL FOR PLAY

Campfire Girls of Campbell are working hard on the operetta "The Feast of the Red Corn," to be given January 13, in the Grammar School auditorium.

All Campfire Girls, from the smallest to the largest, will be able to take part.

Some of the girls are also members of the cast of "The Midnight Tryst," which will be presented the same evening by the Boy Scouts and Campfire Girls.

"The Midnight Tryst" was written by our own Mr. "Tac" Cutting, who also has charge of the directing of the play.

Miss Marian Jenkins, gaurdian of Cherokee group, is directing the operetta with the help of Miss Kittie Johnson, assistant guardian

The beautiful scenic background being painted by Mr. F. H. Cutting, is near completion. School children gather in front of the paintings at all times of the day and stare with round eyes at a real "honest to goodness" artist painting a real "honest to goodness" painting. Although the stage may be full of children at times, Mr. Cutting paints placidly on.

There are to be other numbers on the program by the various divisions of Scouts.

The evening will be well spent. Save the date, January 13.

Two Representatives on Chest Council

Mrs. Jas. Turner and Mr. F. H. Cutting of Campbell were elected at Tuesday's meeting as members of the Community Chest Council to represent contributors from this section.

The chest is incorporated under the State laws and every contributor is a member. There is an annual stockholders meeting where reports are made and directors are elected. The books are also open for any stockholder to examine.

Safety P.T.A. Topic

Safety, will be the topic of discussion at the next meeting of the Campbell Grammar School Parent-Teachers' Association.

On Tuesday, December 6, the association will meet in the school auditorium and listen to a program covering this most important subject. Mrs. Graham of Saratoga will be one of the principal speakers.

And there'll be other surprise feautres and special fun for the youngsters, who come with their mothers, and the Campfire Girls will be there to care for the children and sell some pot holders they have made and there'll be refreshments.

A "Regular" meeting.

Do Your Share

Have you done your share to make Prune Week a success? Reports from various parts of the county are encouraging, but the local stores still have a considerable number of boxes unsold. These will make fine Christmas gifts and can be sent by express anywhere for 48 cents or by parcel post, which is cheaper, to the nearer zones.

Help to make the campaign go over big. Buy at least one box.

Automobile License buying time comes right along with Christmas shopping time and motorists are being urged to adorn their cars with the new blue and gold 1928 plates at the same time that they are decorating the Chirstmas tree. The renewal registration period has been advanced to December 15 this year by Frank G. Snook, chief of the State Motor Vehicle Division, to facilitate the tremendous task of issuing new plates to some 1,700,000 California automobile owners in a comparatively brief period.

DR. BOONSHAFT TALKS TO CLUB

Campbell Kiwanians were the guests of the San Jose Club Monday with several other visiting club members.

Doc Beall, who recently (barely) escaped from Folsom following the prison riot, was chairman Tuesday, and told of some interesting experiences while visiting that place at the time of the riot. Doc Was not named among the missing because he was denied a hunting license at the gate.

Dr. Boonshaft of San Jose gave an interesting discourse on "tuberculosis," one of the oldest diseases known to man. Although it was studied and treated several hundred years before Christ. The germ was not discovered until 1882. The disease although one of the most dreaded of chronic diseases, is one of the easiest to arrest. Practically all children are infected before the age of 15, but by their vigor and vitality are able to throw it off and are thereby immunized. Only about 1 per cent get the active cases. Measles and whooping cough weaken children leaving them more susceptible to tuberculosis. The mortality from this malady has been reduced 50 per cent in 20 years, a remarkable advance when we consider that there are just as many cases at present as ever before.

By the rest cure, a child can generally be restored to normal condition in 6 to 8 months. Three requisites are necessary, REST, FRESH AIR and WHOLESOME FOOD. Climate means nothing, co-operation between patient and physician, everthing.

Tuesday will be election day with President "Tac" Cutting presiding. Reports of the Chairmen of the various committees will be made.

RUN DOWN BY AUTO

Miss Marion B. Evans, who, with her sister, Mrs. E. S. Sparrell, lives in Mrs. Amelia Merrill's house on Campbell avenue, very fortunately escaped with minor bruises from what could easily have been a serious accident.

Sunday evening she had just started across from the new Miller store corner towards the Farley Real Estate office and turned to see if any machine was coming when run down by the H. S. Young auto.

Picked up, stunned from the fall, as she struck upon the back of her head, she was taken to Dr. Merrill's office. No serious injury.

Aside from a slight scratch made by her back comb and a small bump on her head, she was feeling quite well the following day, and hoped to be out again soon.

Lone Scouts Tumble For Benefit

The Lone Scouts of the Campbell Wigwam have recently been engaged in practising for their part in the show which comes off January 13, with "The Midnight Tryst," under the supervision of Mr. T. A. Cutting. Their part is a tumbling act that will be quite an extraordinary feat, as it takes quite a bit of skill to do real tumbling.

Williard C. Loughlin L. S. S. G. C., who is the organizer and foremost booster of the Campbell Lone Scouts, was recently elected 1928 Lone Scout Council Chief for Council 12. Council 12 includes Oregon, Arizona, Nevada and California, so it looks as if Willard has quite a bit of territory under his supervision. He plans to do his very best to encourage Lone Scouting in his Council.

Several Lone Scouts will make an auto trip to Indian burial grounds near Pescadero soon. They will bring picks, shovels, grub and outfit for a stay in which they hope to unearth an Indian's skeleton and some good relics.

GRAPE GROWERS FINISH SEASON

Choice Grapes Sell for as High as $100 a Ton—Nearly 10,000 Cars Bought.

Grape growers finished their last picking this week. It was a peculiar season. Some of the growers about Los Gatos reported that part of their crop never ripened. Lack of water, together with early rain left some grapes green on the vines when the last were picked. Still there was a large crop of both wine and table grapes and the growers realized very good prices. Choice grapes sold as high as $100 a ton, while average fruit brought $40 and $50.

California sent to the Eastern markets 10,000 carloads more than it shipped a year ago and at better prices. There was no glutting of the market this year like last, due to more scientific marketing and so higher prices were maintained throughout the season.

First Class Carpenter and Contractor wants work in or oraund Campbell. Building, built in work in modern homes especialty. Address, Sidney Ward, Los Gatos; care of Harry Ryan, Call of Wild Ranch.

It is almost as difficult to hide a cough as it is to hide love.

CHECK BRAKE PULL-BACK SPRINGS

The brake pull-back springs on your car should be at proper tension to release the brakes when not in use, suggests the free emergency road service of the California State Automobile Association. If the brakes will not release properly, oil the working parts.

TEXAS FARMS MOTORIZED

Texas leads all states in the number of farm-owned motor vehicles, reports the California Automobile Association. The Lone Star State has a rural registration of 262,000 cars and 23,000 trucks.

PIANO for Sale—near Campbell, Beautiful high grade piano; bargain; cash or terms; $10 monthly to reliable party; if interested, write A. D. Mac Coleman. factory piano adjustor, care Lawrence Warehouse and Transfer, Sacramento.

John Brown and His 'Self Supporting Son'

By FRANKLIN HICHBORN

John Brown had—and has for that matter—one child only., a son. He put the lad through high school and university, straining his resources to do so, and, toward the end of the university term, running in debt a bit. But the boy graduated with honors, got a job almost immediately at $250 a month, which was almost as much as John Brown himself was receiving. Young Brown thus prepared for life's battle and "self-supporting" at last, his proud father settled down to await the coming of his grand-children and to wipe out the debt due to that college career.

But there were no grand-children—or, at least, haven't been yet, and probably never will be. Young Brown is a conscientious soul and didn't consider his $250 a month enough to justify marriage. He felt that he could afford a high-priced car, however, and bought it. He, so far as his modest income would permit, pitched his life on the high-priced car basis. Being conscientious, he did not run into debt, but lived strictly within his income, spending exactly all of his $250 a month. On this "self-supporting" basis, he continued for six years. By the end of that period, he had had three raises, was drawing $375 a month, and was still "self-supporting" for he scrupulously kept his expenditures down to his exact income. In the meantime, John Brown, his son "self-supporting," had paid off his debts, and accumulated a modest saving account against a rainy day.

And then the "self-supporting" son developed tuberculosis. It was quit his $375 job, or die. John Brown was confronted with the alternative of letting his boy die, or financing a long siege of it at a sanitarium.

Today, his savings almost gone, John Brown thinks he is paying sanitarium bills. In a way he is. But he is paying for something more. He is paying for a certain high-priced car; the bill of six years of wasteful living which his "self-supporting" son, keeping scrupulously within his income, enjoyed.

The corporation which had had the benefit of young Brown's services, carefully figured "depreciation charges." Young Brown had considerable to do with this particular figuring, but never seemed to appreciate the lesson of it, for he has not yet learned that he who spends all his earnings has not become self-supporting.

No Toy Soldiers

We are again approaching the Christmas season and our gifts to children should carry no suggestion of destruction. It is hoped that parents will ponder carefully over their holiday gift lists and eliminate therefrom tin soldiers to suggest war, or firearms with which to kill birds or animals. Even toy guns carry the thought of destruction and should be eliminated. It is by fostering kindness toward animals in the hearts of children that the foundation is laid for a future life of kindness toward man.

There is a great variety of toys for children, which stimulate the imagination along wholesome lines. A boy's possession of a gun of any description inevitably makes him think of the taking of life, of destruction in some form or other. Weapons enhance man's arrogance toward the lower creation and it is both shortsighted and unwise to load boys with toys that stress man's combativeness and aggressiveness. Psychologically it is a mistake to arouse a child's fighting instincts. Morally it is crime to place any kind of weapon in the hands of an immature and impressionable child. Parents should think twice before they buy Christmas gifts for children.

Material for Films

It is suggested to the Chambers of Commerce or Californians Inc., or those bodies interested in advertising California throughout the world that they are overlooking some valuable material for scenic films in the Santa Cruz mountains. From Loma Prieta where San Francisco Bay, Monterey Bay, and dozens of historic spots can be seen. The old Almaden mines site, the Guadalupe mines, the Winchester House, Moody Gulch Oil Fields, State Redwood Park, Mt. Hamilton, Saratoga in Blossom Time, the Los Gatos Pageants, San Jose Rose Festival parades and hundreds of other scenes would serve well to be shown on the screen while soft music imitating the voices of nature are played on the pipe organ.

Lots of people make a specialty of pouring ice water on enthusiasm.

Never judge a man's greatness by the opinion his neighbor has of him.

VALUABLES DESERVE PROTECTION

With only a little effort the burglar can open the ordinary home or office safe. With greater ease he can ransack desks, bureaus, and search under carpets, back of picture frames and in all the other places that are chosen as clever and original hiding spots. Fire is an even more thorough thief. Valuables can be properly protected only in a modern safe deposit vault which is proof against fire, burglars and all other hazards. The cost is small.

All types, numerous sizes, including Handpower, Horsepower, Gaspower, Autopower, Truckpower. Wire rope, equippments. Auto or Truck Pull-You-Out, the $4.00 Bad-Read-Winch. Waterwheels, Automatic Driveway Gates. Deep Ditching. Ducrest Mfg. Route 11. Seattle, Washington.

A CAPABLE Housekeeper wants position in city or country. Address, Box 743, Campbell, Cal.

RUG WEAVING — Bring me your rags sewed. Prices reasonable. Mrs. C. M. Ricker, 83 Harrison street., Campbell.

WANTED—Hear from owner, Ranch for Sale. State cash price, particulars. D. F. Bush, Minneapolis, Minn.

Town Tales Tersely Told

Christmas Cards at Smith's

Miss Alice Strom was home from Monterey for the Thanksgiving holidays.

The M. E. Purmort family had Thanksgiving dinner with Mrs. and Mrs. Fred Gillis at Burlingame.

Miss Elizabeth Turner returned to Fresno Sunday, where she is physical instructor for girls in the city schools.

Mr. and Mrs. Graham Peake of Saratoga are recieving congratulations on the birth of a son, Monday, November 28.

The W. I. Shadle family, who came to Campbell from Texas some time last spring, left Wednesday for Corona.

Mr. and Mrs. G. L. Speegle spent their Thanksgiving at Modesto with their daughter, Mrs. G. C. Archibald and family.

Gladys Larsen, five-year-old daughter of Mr. and Mrs. Fred Larsen of Moorpark avenue, will recite over the radio this afternoon.

Mrs. A. J. Jones, who suffered a paralytic stroke several weeks ago, is not improving,rather, seems to be failing, Mr. Jones reported.

Mrs. Margaret Murdock and Mrs. L. Harbidge enjoyed a holiday trip last week, visiting at Sebastopal, Napa, Vallejo and other points, returning Thursday evening.

Mrs. S. R. Wheeling of Bryte, Calif., is visiting relatives, the E. G. Lanz family. She had been for several weeks in San Francisco under the care of a brother, who is a physician.

Miss Una Hart, who teaches at Burbank, accompanied by Mrs. N. Pickering and her mother, drove up for the holidays and were guests of Miss Hart's uncles A. A. and M. E. Purmort.

Monday, December 5, the Country Woman's Club will meet to consider the social life of Holland, with Mrs. C. H. Whitman. The meetings have all been very interesting and pleasant so far this season and others, just as good, are still in store.

The Campbell Laundry has its new building, 22x60, under way on North Central avenue and new machinery has been purchased to increase the daily output. Mr. Barnes is planning for a steadily growing business and will keep up with the demand.

Christmas Candles at Smith's

Mrs. J. B. Gard enjoyed a visit last week with her brother, J. W. Harris from Benecia.

Ocowasin group of Campfire Girls will hold a pot holder sale, Tuesday, December 1, at the meeting of the Grammar School Parent-Teachers' Association.

Mr. and Mrs. Herman Baum (nee Hazel Green- are rejoicing ovr the birth of a son, Saturday, November 26. The young man has been named Glenn Allan.

Mrs. W. H. Stray has so far convalesced from her recent operation as to take short rides and can receive callers, except from one o'clock to three in the afternoons.

Mr. and Mrs. Herbert Gard were down from San Francisco over the week-end to visit his parents. "Joe," as he is familiarly known to his host of acquaintances, is still confined to his home with an attack of rheumatism.

Junior Red Cross Army of 6,000,000 in Schools

Members of the Junior Red Cross proved a new capacity for service during the Mississippi flood, according to reports to Red Cross National Headquarters covering their work.

This group of enthusiastic school children responded spontaneously and generously to the needs of the flood victims. An indication of the importance of this help is contained in the report that Juniors in Boston one contributed $7,500 to the relief fund.

Junior Red Cross members shared in reconstruction w k in the Midwest tornado several years ago, after the Florida storm, and are in the post-flood operations of the Red Cross among the people in the Mississippi Valley.

Junior Red Cross has 5,822,757 members, an increase of 273,329 in the last year.

More than a million of the Junior Red Cross membership is distributed in the Philippines, Hawaii, Guam, Porto Rico, the Virgin Islands, and Alaska, and includes Indian and Eskimo children. Through the medium of the Junior Red Cross in the United States, and similar groups abroad, children all over the world are being brought into closer understanding by international correspondence carried on by classes in the schools.

The Juniors at present have nearly twice the membership of the senior organization, but in the forthcoming membership enrollment of the Red Cross, from November 11 to 24, the goal of the adult membership is 5,000,000.

MORE AUTOMOBILES THAN TELEPHONES

Maryland has more automobiles than telephones, reports the California State Automobile Association, the passenger car registration being 259,000, compared with 192,350 telephones.

MOUNTAIN APPLES — From Peak Farm; Red Hoovers, 75c and $1.00 a Box. Ralph Herring, Winchester road, Mission Hatchery, Campbell.

Oliver Kimmel Dies at Watsonville

Oliver Perry Kimmel, who has been in very frail health for some months, passed away Tuesday morning, November 29, at the home of his daughter, Mrs. Ethel Price of Watsonville.

Mr. Kimmel was born September 8, 1845, in Indiana, and moved with his parents in a covered wagon to Iowa when he was eights years old.

January 6, 1876, he was married to Lucinda Casper, and four children were born to them. Of these, two daughters are still living, Mrs. Maud Sharp of Modesto and Mrs. Ethel Price at Watsonville.

Mr. and Mrs. Kimmell came to Campbell 14 years ago and have made this their home since that time, going to their daughters but a short time ago.

Funeral services will be held Saturday, at 11 o'clock, from the funeral home of Aston & Neals, at Watsonville.

Mr. and Mrs. Kimmel had made many friends here, who extend to her their sincere sympathy in her hours of sorrow.

Aged Editor Dies at Los Gatos Home

One of the pioneers of the county and a newspaper man of the old school passed to his reward last week, when W. H. Trantham of Los Gatos died.

He was a highly respected neighbor and faithful church attendant, and for years was editor and owner of the Los Gatos News before its consolidation with the Mail.

He was a native of Missouri, beyond the four score and ten-year allotment and in early days associated with some of the big, outstanding men of his time in his native State, where he was both an educator and editor.

He is survived by his wife, Fannie E. and Son, Henry, of San Francisco.

RED CROSS ADVANCES IN HEALTH PROTECTION

Record for Progress Is Made in Protecting People of Vast Flooded Section.

Record health protective activities marked the year's service of the American Red Cross in this field. The outstanding health accomplishment was the successful conclusion of the emergency health program launched as part of the relief work in the Mississippi Valley flood. In co-operation with State and Federal health agencies, the Red Cross successfully conducted a campaign designed to prevent epidemics as a result of flood conditions.

Thousands were immunized against typhoid and smallpox, preventive measures against malaria were undertaken, and as the flood receded an intensive clean-up program was set in motion to purify water supplies, provide sanitary surroundings of rural communities and complete other health protective steps.

Beside the emergency work, the Red Cross Public Health Nursing Service developed about 100 new community nursing and health services throughout the country. Nurse instructors and others operating under the Red Cross also extended training in Home Hygiene and Care of the Sick to both adult and junior groups, the latter in educational institutions in certain instances. Every State, Alaska, the Hawaiian Islands, the Philippines, Porto Rico, and the Virgin Islands, had Home Hygiene classes which showed a large increase.

One contribution to national health achieving a growing recognition is the nutrition instruction service, through which thousands of adults and school children are learning the proper foods for health and the fundamentals of correct food habits in relation to health. Classes include housewives, school children, foster-mothers, policewomen, women having charge of homes and institutions, business girls and students in universities and colleges.

Besides these direct services for better health, the Red Cross enrolled reserve of nurses mounts to more than 45,000. These nurses are available for disaster relief service, epidemics and other serious emergencies, and are on call for duty with the Army, Navy and the Veterans' Bureau.

Red Cross health services are increasing in scope, it is pointed out, in calling attention to the forthcoming enrollment of new members in the Red Cross ranks, through whose support all Red Cross activities are made possible. The enrollment will take place from November 11 to 24.

New Ford Today at Clancy & Cullen's

After six months "saying nothing, but sawing wood," Henry Ford today announced the specifications of the new Ford car which succeeds his famous model T. A bare listing of those specifications presents a picture of an automobile that in performance, appearance and mechanical features has heretofore been associated with a considerably higher price class.

Uusual speed and acceleration are among the outstanding features of the new car. It is announced as being able to make 55 to 60 miles an hour, with ease. In recent tests it has made even more without difficulty. What is more important, it is stated that when traveling at such speed, it holds the road easily and with comfort to driver and passengers. It is also stated with equal positiveness, however, that it performs in an equally spectacular manner on bad roads. In its design, Mr. Ford has held to his original idea of a car which can meet all conditions and types of roads.

Appreciating the constantly increasing importance of acceleration, the Ford Motor Company has given a great deal of study to this feature of the new car. In high gear tests with two passengers in a Tudor sedan it has shown an acceleration of from 5 to 25 miles an hour in 8½ seconds.

The new Ford also introduces a new type of four-wheel brakes. An exclussive Ford development, they are of the mechanical, shoe-expanding type, and are self-centering. The brake pedal and the hand brake each operates all four brakes. It is stated that this is the most reliable and simplest type of four-wheel brake, and also the easiest to adjust, all adjustment being made from the outside without removing any parts.

An engine that is practically vibrationless develops 40 horsepower at 2200 revolutions per minute. This low revolution speed in ratio to the high horsepower is illustrative of the unusual efficiency of the engine. Also, it means longer life, the lower engine speed insuring less wear on engine parts. The low revolution speed is also a substantial factor in lessening vibration. The bore is 3⅞ inches, stroke 4¼ inches. The unusually large crankshaft, which is both statically and dynamically balanced, weight 28 pounds. This balancing, combined with lightness of alluminum alloy pistons, further combine to reduce vibration and increased riding and driving comfort and safety.

In addition to freedom from vibration, it is announced that the car is unusually quiet, a great deal of attention having been paid to this feature by the Ford engineers. In the engine, the timing gears are made of bakelized fabric, which is much quicter than metal. The cams on the camshaft have been so designed as to prevent valve clicking.

The coachwork of the car is as distinctive as its performance. There is a noticeable European touch in line and contour. It is not only designed for exterior beauty, but has as well the interior roominess, convenience and luxurious appointments to be found in much higher priced automobiles. On an instrument board of satin-finished nickel are mounted the speedometer, gasoline gauge, ammeter and ignition lock, with a dash-light in the center. The new military-type sun visor, with crown roof and round corners, are features of the closed models. Unusually narrow pillars and very wide doors and windows give maximum vision. Nickeled radiator shell and headlamps further accentuate the exterior attractiveness, while choices of four colors in pyroxylin finish are offered.

Simplicity in design has also been carried to the ignition. There is only one coil, in a waterproof case. There are no vibrators to adjust, and no exposed cables to work loose or short circuit from water. The distributor is located in a readily accessible position on the top of the engine.

From 20 to 30 miles to a gallon of gasoline, depending upon driving speed, is the gasoline consumption announced. Feed to carburetor is by gravity.

The oiling system, also a distinctive Ford design, is a combination of pump, splash and gravity feed. The new transmission is of the selective sliding gear type, with standard shift, three speeds forward and one reverse. The main shaft runs on ball bearing and the reverse idler on bronze bearings, a power-saving design unusual on light cars. Shifting of gears is noiselessly and easily accomplished, at the pressure of a finger

Multiple dry-disc clutch, rear axle of three-quarter floating type housed in electrically welded steel, and spiral bevel gear drive are interesting features The axle shafts carry none of the weight of the car, the wheels running on roller bearings on the housing. Newly developed springs of the transverse semi-elliptic type and hyraulic shock-absorbers prevent excessive up-and-down movement and remove side sway.

Irreverible steering gear, which prevents shocks from being transmitted to the hands of the driver, makes handling exceptionally easy. Maximum steering safety is further provided by a gear housing of welded steel forgings, and a steel tube steering column welded into the housing, making a sturdy and exceptionally safe one-piece unit.

Ford-designed steel spoke wheels, completely welded into one-piece assembly, are provided.

There are six new models of the new car. They are the phaeton, roadster, sport coupe, coupe, Tudor sedan and Fordor sedan.

Local dealers are preparing for a public reception next Friday, when models of the new line will be shown in photographs and charts.

RED CROSS FLOOD RELIEF IN SOUTH COSTS $17,000,000

Greatest Disaster of History but One of 111 Operations in Year of Calamity.

Tornadoes headed the list of disasters which struck the United States in the past year, the report of Red Cross relief operations for the year ending June 30, showing 29 great storms. Floods were second on the list, 24 being recorded for the same period.

This record does not include the St. Louis tornado which occurred in the current fiscal year, as did a number of other storms and disasters since, in which the Red Cross provided relief.

Included in the list of 111 disasters covered by the record of the past year's relief operations of the Red Cross, are earthquakes, explosions, mine disasters, a cloudburst, a hailstorm, fires, floods, hurricanes, a railroad wreck, a scarlet fever epidemic, typhoid epidemic, tornadoes, and a typhoon. The latter occurred in the Philippines, but is included in the operations at home. In all, the Red Cross extended its services in 77 major disasters in the United States and in 20 abroad, including a hurricane over Havana, Cuba, and the Isle of Pines, one in the Bahamas, and others through various West Indian regions, fire in Porto Rico, another in Haiti, earthquakes in Armenia, Japan and Albania, floods in Jugo Slavia and Mexico.

The organization conducted refugee relief operations in Syria, Bulgaria and China, the latter largely due to factional wars fought over various parts of China the past year.

The two outstanding disasters at home were the Florida hurricane and the Mississippi Valley flood. Rehabilitation operations of the latter disaster are still in progress under the Red Cross. A national appeal for funds was made in both disasters, resulting in contributions for relief amounting to more than $20,000,000.

The Mississippi flood is the outstanding disaster in the whole history of the Red Cross disaster relief service. In this one catastrophe the organization raised through subscriptions by the people of the country and foreign nations approximately $17,200,000 for relief use. Aided by this fund it fed, clothed, sheltered or otherwise assisted more than 600,000 human beings, fed and cared for approximately 200,000 head of livestock and established 149 refugee camps. The flood inundated approximately 20,000 square miles and affected 174 counties in eight states. Some 330,000 homeless persons were sheltered in Red Cross camps. When the emergency was at its height the Red Cross was serving more than a million meals a day.

So vast was the work imposed on the Red Cross and allied agencies conducting rehabilitation that this phase of the flood relief task is expected to extend well into the coming year. Up to September 15, 104,441 families in the flood zone had been given rehabilitation assistance by the Red Cross, and 1,700,000 acres of flooded crop land in seven States had been replanted with Red Cross aid. There had been expended or committed for expenditure in connection with this relief and rehabilitation work a total of $15,630,000.

The appeal for a nation-wide membership increased to 5,000,000 adult members, it was pointed out, is based on the realization that demands on Red Cross service such as occasioned by disaster relief are increasing each year. For that reason especial importance is lent to the Eleventh Annual Roll Call of the organization, to be held from Armistice Day, November 11, to Thanksgiving, November 24, during which this membership will be built up.

Excellent growing conditions during the late summer have brightened the outlook for bean yields of the State. Beans "other than limas" are expected to total 2,473,000 bushels, while all varieties will produce a yield of 4,897,000 bushels, compared to 5,740,000 bushels a year ago.

The second car of navel oranges for the season to be shipped through the Tulare County Fruit Exchange at Porterville, of which W. E. Sprott is secretary- manager, went out from the Tule River packing house in the Success district, east of Porterville last week. This fruit went to San Francisco as did the first car of the season which moved from the Sunland packing house in Piano district early in the week. The first car was exported to Australia, returns being approximately $6 per box.

Harvesters of the San Fernando Valley lettuce crop are in the midst of their work loading trucks for market. The crop is now packing about 30 to 35 per cent. Most of it, still in the fields, is of rich green color and attractive to motorists passing by on the highways. Recent rains have done some slight damage. Growers assert that if another week of cool weather is maintained the best part of the yield may be gotten to market in fine shape. In the valley this year only 3000 cares were planted to autumn lettuce. Last year 8000 acres were planted.

California supervisors may fix the bonds of county officers at any time should they fail to do so on or before September 1 as provided by law, Attorney General U. S. Webb has notified Leroy McCormick, district attorney of Tulare county. Webb, in the same opinion, also ruled that the supervisors have no authority to set the amount of bonds filed by deputy county officers, that authority being vested with the appointing power.

Ground-breaking ceremonies marked the starting of construction at Santa Ana last week of the $150,000 Orange county plant of the Weber Baking company to be erected on the site at the junction of Placentia avenue and the State highway adjoining the Orange county fair grounds. The plant, a two story brick structure with ornamental front and covering a space of 85x150 feet, will be built by Hamlin & Young of Anaheim.

The annual Pacific slope dairy show concluded a week of exhibitions and contests at Oakland last week. Miss Emma Handy of Marysville, is the champion milk maid of the State after milking 11.8 pounds of milk in three minutes. Miss Ona Leslie of Torrence won second prize and Miss Ruth Stewart of Santa Rosa, third. Santa Rosa won the junior judging contest in products; Fremont High School of Oakland won second prize and Marysville, third. Santa Rosa also won the milk and butter-judging and the high school agricultural judging. Fremont High School won the cheese judging.

The State Athletic Commission since it first began functioning has collected $403,842 in five per cent taxes from fight promoters throughout the State. Of this sum there still is on deposit with the State treasurer $330,922. The latest financial standing of the commission has just been given out by Walter A. Yarwood, secretary. During the present calendar year the commission has collected $110,777, of which $8,857 was taken in during October. October receipts in 1926 totaled $12,083, and in 1923, $13,667. The total tax for the entire year of 1926 was $146,294, and for 1925, $146,769.

The wooden gold dredger at Trinity Center near Redding is being torn to pieces, the field being given up after ten years active operation. Boulders encountered made it unprofitable to dredge any longer, it was stated. The dredger, 156 feet long and 50 feet wide, was the largest wooden gold boat in the world.

During the past year there have been 1,638 accidents at railroad grade crossings in which more than 800 were injured and 143 killed, according to figures gathered by the public safety committee of the California Highway Development Association. The report calls attention to the fact that at the last legislature, State Senator Roy Fellom introduced and secured the passage of a $10,000,000 bond issue for the separation of railroad and highway crossings. This measure will come up next year for ratification by the voters.

The Riverside district has recorded the biggest citrus year in its history, with 5990 carloads of fruit shipped. Returns to growers were at least $7,000,000, and for the entire county will probably exceed $10,000,000. There were 5643 carloads of oranges and grapefruit, and 347 carloads of lemons shipped from Riverside area during the 1926-1927 season.

Frost warning service will again be rendered by the Porterville Chamber of Commerce this season for benefit of citrus growers and others desiring this information. This service has proven of great benefit to growers during other seasons. The greater portion of the growers are reached over telephones, while bulletins are also posted.

Planting of wheat, barley and other grains in the Tulare county grain districts will soon be in full swing and much plowing was started as a result of recent storms, according to Farm Adviser C. M. Conner. Bart wheat will be the favorite this year, while some Sonora will be planted. A number of growers recently began seeding barley for feeding purposes.

SUMMONS

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA IN AND FOR THE COUNTY OF SANTA CLARA.

HERMAN HORTON KOOSER
Plaintiff vs.
CORA E. GILLESPIE and CORA E. GILLESPIE as Sole Trustee of T. J. GILLESPIE PLANING MILL CO., a defunct corporation, also all other persons unknown, claiming any right, title, estate, lien or interest in the real property described in the complaint adverse to plaintiff's ownership, or any cloud upon plaintiff's title thereto, Defendants.

SUMMONS—

THE PEOPLE OF THE STATE OF CALIFORNIA send greeting to CORA E. GILLESPIE and CORA E. GILLESPIE as Sole Trustee of T. J. GILLESPIE PLANING MILL CO., a defunct corporation, also all other persons unknown, claiming any right, title, estate, lien or interest in the real property described in the Complaint adverse to plaintiff's ownership, or any cloud upon plaintiff's title thereto, Defendants.

YOU ARE HEREBY DIRECTED to appear and answer the Complaint in an action, entitled as above, brought against you in the Superior Court of the State of California, in and for the County of Santa Clara within ten days after service on you of this Summons, if served within this County or within thirty days if served elsewhere.

The object of the above entitled action is to obtain a judgement and decree of said court that the plaintiff, Herman Horton Kooser, is the owner in fee of all that certain real property Situate in the City of San Jose, County of Santa Clara, State of California, Bounded and described as follows, to wit:

BEGINNING at a point on the Southerly line of San Carlos Street distant thereon Eighty (80) feet Easterly from the common corner of Lots 69 and 70 of the Subdivision of the Los Coches Rancho on said Southerly line of San Carlos Street; thence Southerly on a line at right angles to said Southerly line of San Carlos Stret, being the Easterly line of the property conveyed by the T. J. Gillespie Planing Mill Company, a corporation, to I. B. Knowles by Deed dated July 25, 1892, and recorded July 26, 1892 in Liber 150 of Deeds, page 324, to its intersection with the Northwesterly line of the lands of the South Pacific Coast Railroad Company as described in the Deed to said Railroad Company recorded in Liber 40 of Deeds, page 624, records of said County of Santa Clara; thence Northeasterly along the Northwesteriy line of the lands of said Railroad Company to its intersection with said Southerly line of San Carlos Street; thence Westerly along said Southerly line of San Carlos Street Two Hundred forty-five and 8-10 (245.8) feet, more or less, to the point of beginning, being a triagular portion of Lot 70 of the Subdivision of the Los Coches Rancho as shown on a Map thereof of record in the office of the County Recorder of said County of Santa Clara in A of Maps, page 47, records of said County.

And also to obtain the further judgment and decree of said court that all adverse claims made by you or either of you are wholly without merit and absolutely void; that plaintiff is the owner in fee of said property as above set forth, and that you and each of you be forever barred and restrained from claiming any or asserting any claims of any nature relating to said property, or any part thereof adverse to the plaintiff.

AND YOU ARE HEREBY NOTIFIED that unless you so appear and answer as above required, the said plaintiff will apply to the Court for the relief demanded in said complaint.

Given under my hand and seal of the Superior Court of the State of California, in and for the County of Santa Clara, this 17th day of August, A. D. 1927.

HENRY A. PFISTER, Clerk.
By B. I. McCARTY,
(Seal) Deputy Clerk.

BOHNETT, HILL & CAMPBELL,
Attorney for said Plaintiff.

SUMMONS
35378

In the Superior Court of the State of California, in and for the County of Santa Clara.

HARRY ZONES, Plaintiff, vs STELLA ZONES, Defendant.

Action brought in the Superior Court of the State of California in and for the County of Santa Clara, and the Complaint filed in the office of the Clerk of said County of Santa Clara.

The People of the State of California send greetings to STELLA ZONES, Defendant.

You are hereby directed to appear and answer the Complaint in an action, entitled as above, brought against you in the Superior Court of the State of California, in and for the County of Santa Clara, within ten days after service on you of this Summons, if served within this County, or within thirty days if served elsewhere.

And you are hereby notified that unless you so appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the Complaint as arising upon contract, or will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the State of California, in and for the County of Santa Clara, this 4th day of November A. D., 1927.

(Seal) HENRY A. PFISTER,
Clerk.
By R. I. McCarthy,
Deputy Clerk.

MARTIN S. WALSH, Santa Clara, Calif., Attorney for Plaintiff.

First Publication, November 11, 1927.
Last Publication, December 30, 1927.

BIDS WANTED

Sealed bids will be received by the Trustees of Moreland District on Saturday, December 3, 1927, and opened at 10 o'clock a. m. of that day, at Moreland School for one (1) Ford school bus, as per specifications filed with the clerk. Bids must be filed with the Clerk of the Board.

The Board reserves the right to reject any or all bids.

By order of the Board of Trustees of Moreland School District.
Wm. NOETHIG,
Clerk.

In order to forecast the weather with a reasonable degree of accuracy all you have to do is predict anything you don't expect.
